

FIBALON[®] plus

Your *plus* for crystal clear water

in aquariums

in fish ponds

in fish farms

Suitable for fresh- and saltwater and any type of filtration system

FIBALON[®] plus

- » Innovative combination of optimized polymer fibers with a scientifically modified surface structure and fiber cross sections
- » Features the developed fiber fixation DyFix[®] to guarantee a high particle retention rate and deep penetration of particles into FIBALON[®]
- » Actively counters substances which can form odor and create turbidity
- » Provides crystal clear water and provides long lasting protection against water pollution

FIBALON[®] plus

The *plus* is for You

FIBALON[®] plus

- » Long life product
- » High dirt holding capacity
- » Easy handling
- » Use as pre-filter or final-filter possible
- » No ingredient release to the water
- » Superior filtering characteristics
- » Greater surface area
- » Uniform flow through
- » Free of chemical residues

Our recommendation:

Change out at least one third of FIBALON[®] plus after each filter cleaning cycle. This way an optimal water quality can be achieved.

Certified fibers according to ÖKO –TEX[®] Standard 100
